AIUKEN CYBERSECURITY

International IT Security company specialized in Security and Cloud Services solutions

Profile

Multinational Cybersecurity company offering protection to corporations, telecommunications systems, government and critical infrastructure. Aiuken's unique next generation SOC platform powered by AI proprietary technology offers a full suite of cutting-edge services: detecting, identifying and protecting against cybernetic threats, and responding to incidents from their own SOCs 24/7. The company operates 5 Managed SOCs and has over 500 multinational Customers in 12 countries across 4 continents. Aiuken Cybersecurity's unique platform protects public and private cloud systems, as well as on-premises.

Products & Services

ASIP platform (Aiuken Security Intelligence Platform), for the management of SOC services, with technological integration capabilities for security solutions, Threat Intelligence, security service portal, dashboards, advanced detection and correlation capabilities through AI, Threat Hunting and response capabilities through SOAR.

BUILD38 **MOBILE APP PROTECTION**

Taking Mobile App Security to the Next Level

Profile

Build38 provides Next-Gen Mobile App Protection solutions that combine AI and the strongest App shielding technology worldwide. We serve various industries such as the financial sector, digital services, healthcare, and more. We are headquartered in Munich with offices in Barcelona and Singapore. We have been recognised in the GARTNER HypeCycle for Application Security and are the first to combine In-App Protection, cloud-based Active Hardening and Threat Intelligence.

Products & Services

Build38 provides a comprehensive Cloud-Augmented Mobile App Security Platform that empowers businesses to effectively counter security attacks targeting their mobile apps. The platform stands out with its advanced Mobile App Self-Protection, cryptography, and AI-driven Active App Hardening, as well as Cloud-Based Threat Intelligence. With three flexible integration options: Build38 Low code, Build38 No Code and Build38 Master code.

whatis.maltiverse.com

MALTIVERSE

Helping organizations to adopt Threat Intelligence with the minimum friction possible

Profile

Maltiverse is a threat intelligence platform. It works as a broker for Threat intelligence sources that are aggregated from more than a hundred different Public, Private and Community sources. Once the data is ingested, the IoC Scoring Algorithm applies a qualitative classification to the IoC that changes. Finally this data can be queried in a Threat Intelligence feed that can be delivered to your Firewalls, SOAR, SIEM, EDR or any other technology.

Products & Services

Maltiverse Intelligence: Provides a very robust and valuable threat intelligence baseline ready to integrate to any security device. The data is aggregated from more than 100 different private and public sources and is safe to use as it is curated and cleaned.

Maltiverse Platform: Is a full Cloud-based Threat Intelligence Platform that allows organizations to manage their own threat intelligence. The dataset can be maintained programmatically to expire and prevent false positives.

www.quside.com

QUSIDE

We made it small enough to solve a problem big enough

Profile

At Quside our mission is to deliver the highest performance quantum random number generators (QRNGs) to empower the transition to safer connectivity and more efficient computation for everyone, everywhere. We are an active member of the European quantum community and the Quantum Industry Consortium (QuIC) as well as a key contributor in a variety of projects for the European Commission and National efforts (Clave, Caramuel, QuSpin).

Products & Services

Quside delivers solutions in four key areas:

- Randomness generation: By leveraging its patented quantum technology, Quside is building the strongest randomness foundation for enhanced security and efficient computation.
- Randomness monitoring: each Quside randomness generation product is delivered with a brand-new way of quality testing, known as randomness metrology.
- Randomness processing: RPU delivers a unique randomness accelerator to accelerate up to 10X your randomized workloads with 20X less energy consumption. We also offer RPU Cloud available on the AWS marketplace.
- Quside Entropy Core: The Quside Entropy Core is designed to service random numbers to different client devices, especially those that typically have difficulties in getting quality entropy such as virtualized environments or IoT devices.

SHAADOWIO

Advanced document protection in the digital age

Profile

Shaadowio is a cybersecurity company specializing in advanced document protection solutions. Leveraging cutting-edge technologies like AI, Computer Vision, and Steganography, it provides robust security measures for sensitive information. Shaadowio offers three main services: Trace, to track documents outside secure environments; Stash, for pseudonymizing data to enhance privacy and regulatory compliance; and Verify, ensuring document integrity to prevent fraud. Targeting B2B clients, its solutions are designed for seamless integration and scalability, suitable for a global market. Supported by Telefónica, shaadowio stands at the forefront of cybersecurity innovation, catering to businesses aiming to fortify their digital assets against unauthorized access and breaches.

Products & Services

1. shaadowio trace: Tracks and monitors sensitive documents outside secure environments, ensuring protection and traceability to prevent unauthorized access and breaches.
2. shaadowio stash: Pseudonymizes documents, enhancing privacy and compliance with data protection laws, allowing safe handling of sensitive data without exposing critical information.
3. shaadowio verify: Ensures document integrity to prevent fraud, verifying data remains unaltered.

SOFFID IAM

Identity Hyperconverged Experience

Profile

Soffid IAM brings AM, PM, IGA, IRC & PAM in one powerful and comprehensive platform. Soffid IAM offers an on-premise or cloud-based solution that reduces help desk support workload by 50% and reduces insiders threats by 75%, unlike other vendors that provide a non-comprehensive view of access controls. Organizations could even start with simple Access Management (AM) or Single Sign On (SSO) capabilities and expand their IAM landscape as their needs mature. We are looking for long-term partners worldwide (resellers, integrators and MSSPs) to develop our scalable partner program and grow together with a competitive proposal of revenues.

Products & Services

Soffid's Identity Management solution provides full capability in:

1. Password Management (PM)
2. Access Management (AM)
3. Identity Governance Administration (IGA)
4. Identity Risk and Compliance (IRC)
5. Privileged Access Management (PAM)
