

Who is Who

Logistics & Supply Chain from Spain

A publication which provides a picture of
Spain's Logistics and Supply Chain industry

Message from the CEO of ICEX

Elisa Carbonell

Dear reader,

It is with great pleasure that ICEX Spain Trade and Investment presents the first edition of the Who is Who Spanish Logistics & Supply Chain Guide 2025. This guide introduces the leading companies and key players in Spain's logistics and supply chain industry, showcasing their expertise in transportation, warehousing, and supply chain management while reflecting the country's commitment to innovation and sustainability in an increasingly interconnected and dynamic global environment.

In an international context where logistics and supply chains are undergoing profound transformations, driven by technological advancements, and increasing complexity, ICEX has strengthened its commitment to supporting Spanish companies in adapting to these changes and expanding their presence in key global markets. Beyond providing strategic insights and valuable connections, we actively promote the adoption of cutting-edge technologies, recognizing digital transformation as essential to enhancing the sector's competitiveness and efficiency. In a constantly evolving global economy, integrating innovation is no longer an option but a necessity, ensuring that Spanish businesses remain agile, resilient, and at the forefront of the industry.

Many of the companies featured here are pioneers not only in adopting new technologies but also in providing high-value logistics solutions and services that contribute to the seamless flow of goods and services across international markets. Their expertise, adaptability, and forward-thinking approach—combined with Spain's world-class transportation infrastructure network, which positions the country as a key logistics hub in Europe and globally—are essential to positioning Spain as a global logistics hub.

I hope you find this guide valuable and look forward to the opportunities for collaboration it may inspire.

Warm regards,

Elisa Carbonell
CEO, ICEX Spain Trade and Investment

Logistics *from Spain*

Logistics from Spain is the global umbrella under which ICEX, Spain Trade and Investment, promotes the Spanish logistics and supply chain sector at international events worldwide.

This first edition of the **Logistics and Supply Chain from Spain Guide**, published by ICEX, offers an overview of the sector, highlighting its strengths, talent and dynamic ecosystem.

Spain: International Logistic Hub

Spain is recognized for its network of air, land, rail, and maritime infrastructure, along with the high standard of its services.

Situated in a strategic location in Southern Europe, Spain serves as a key junction for major trade routes. The EU's expansion to the east has further strengthened Spain's strategic position in terms of trade flows and as a hub for the redistribution of international trade within the EU and globally.

Strategic Location & Connectivity

- Spain is a prime location in Southern Europe for the transit of goods, acting as a redistribution centre for EU foreign trade with the rest of the world.

TEN-T Framework

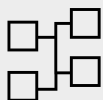

- Two of the nine European multi-modal corridors (the Atlantic and the Mediterranean) in the Trans- European Transport Network (TEN-T) run through Spain.

- Europe's most extensive motorway network with over 17,550 kilometers.

- 46 ports spread over more than 8,000 km of coastline.
- Three Spanish ports ranked among the Top 10 in Europe for container traffic and liner shipping connectivity.

Large number of logistics platforms

- More than 279 logistics parks with a total surface area of more than 82.9 million sq.m

- 46 airports.
- World's largest airport operator by passenger volume.
- TOP 5: Presence in the ranking of EU airports.

Global competitiveness

- Spain's #13 in the world for its logistics performance according to the World Bank's Logistics Performance Index.

Spain stands out worldwide for its world-class network of air, land, rail, and maritime infrastructure, as well as the quality of its services.

Located in a privileged position in Southern Europe, where major global trade routes converge, Spain offers easy access to a global market of over 500 million consumers in Europe. It also acts as a redistribution hub for EU foreign trade with the rest of the world, especially Africa and the Americas.

Extensive Transport & Infrastructure Network

Spain has 46 ports along more than 8,000 km of coastline, with the ports of Bahía de Algeciras, Valencia, and Barcelona ranked among the Top 10 in Europe for container traffic and liner shipping connectivity (UNCTAD).

Spain is the European leader—and second worldwide—in high-speed rail, with over 3,900 kilometers in operation, and has the most extensive road network in Europe, with over 17,550 kilometers.

The connectivity sought by the EU through the development of the Trans-European Transport Network (TEN-T) includes two of the nine multimodal European corridors that run through Spain. These are considered priorities by the European Union, as they are key routes for the movement of goods and people:

- The Mediterranean Corridor connects Spanish Mediterranean seaports with a rail corridor linking North Africa and Central Europe via Spain.
- The Atlantic Corridor provides inland and maritime connections between the Iberian Peninsula and France and Germany, which together account for 12% of the EU's GDP.

A Large Number of Logistics Platforms

Spain has more than 279 logistics parks, covering a total area of over 82.9 million square meters. These platforms are primarily linked to maritime (48%) and road transport (41%).

Logistics From Spain

The logistics and transport sector is one of the most dynamic in the Spanish economy. Key figures:

- The transport and logistics sector accounts for 2,72% of Spain's GDP.
- Annual turnover reaches €112,6 billion and the sector employs 707,000 people.
- There are approximately 156,657 companies operating in the sector.
- International freight mobility: Maritime transport 78,3%, road transport 20,7 3% and rail and air transport together 1%.
- Road transport represents 96% of the total goods volume moved in Spain.

Industry Features & Analysis

Key features of the transportation and logistics sector in Spain include:

- A fragmented market structure, with global logistics firms serving multinational clients alongside local specialized companies with deep regional expertise.
- A strong focus on innovation and expansion strategies among logistics providers.
- A sector in transformation due to sustainability initiatives, leading to growing investments in alternative fuels and green technologies.
- A 25% increase in goods volume at Spain's main ports in 2024, driven by the rerouting of maritime traffic around Africa to avoid threats in the Red Sea.

Innovation, Technology & Startups in Spain

The number of Spanish technology-driven startups focused on logistics has grown significantly in recent years. Private and public incubators, innovation accelerators, and clusters have played a key role—especially those associated with port authorities, which are increasingly investing in Ports 4.0 solutions.

Spanish tech firms are delivering solutions in areas such as:

- AI-powered supply chain management
- Route optimization
- Last-mile delivery
- Autonomous drones
- Automation
- Data analytics for inventory and shipment management

Let's take a look at what the Spanish logistics sector has to offer!

This guide provides an in-depth look at the strengths, opportunities, and key players in Spain's logistics sector — a true gateway to Europe, Africa, and the Americas. Inside, you'll find top-tier business opportunities if you're looking to do business with Spain.

Ports of Spain

Ports of Spain

About	Spain is the second EU country with the longest coastline and its port system is located between three of the most important maritime routes in the world. The Spanish port system includes 46 ports of general interest managed by 28 Port Authorities in charge of providing the infrastructure and leading the port offer. The coordination and control of the Port Authorities is the responsibility of the Public Body Puertos del Estado of the Ministry of Transport and Sustainable Mobility. The synergy between Puertos del Estado and the Port Authorities is driving the transformation of the Spanish port system towards a more competitive model to respond to the challenges of the future. A shared step with a common route: to advance towards safe, innovative and sustainable ports. Puertos del Estado promotes, supports, represents and unites ports to create a more competitive, secure, interconnected and sustainable system. Prepared to respond to the challenges of the moment. So that, with their transformation, ports contribute to the progress and transformation of Spain.

Algeciras Bay Port Authority

About

The Port of Algeciras is the leader of the Spanish port system and the 4th largest port in Europe, with a total traffic of 104.1 million tons in 2024. Located in the Strait of Gibraltar, the second world busiest sea route in terms of maritime traffic. It is a reference point for the lines linking Asia with Europe and America.

Distribution platform for products from Asia and Latin America to Europe, Africa and the mediterranean: direct connection with 200 ports through 142 regular services and 23 shipping lines. Two container terminals – APM Terminals Algeciras and TTI Algeciras, handling +24.000 TEUs mega-ships. PCF classified as 1st class, 24/7/365.

Reference point for refrigerated product traffic, absorbing 47% of the traffic of fruit and vegetable products transiting through Spanish ports.

Intercontinental bridge Europe-Africa: Algeciras help boosting the value chain in strategic sectors (agriculture, textile and automotive).

Our green Strategy comprises a set of sustainable solutions for environmental purposes.

Dry Port of La Litera – Ponentia

About

Ponentia Logistics is developing a large industrial and logistics centre linked to a railway terminal, located in the region of La Litera (Huesca), between Aragon and Catalonia, at the foot of the A-22 motorway (between exits 22 and 27). Work will begin in November 2024.

The Railway Terminal, with a surface area of 165,000 m2, will have 5 lanes for receiving and dispatching goods, 4 loading lanes operated by overhead cranes, with a manoeuvring handle of 950 metres, capacity for 200 reefer connection points, cross-docking warehouses as well as incorporating a customs point within the infrastructure.

The project will allow the development of intermodal transport in the Ebro Valley, an area of great importance in the agri-food sector. Committed to promoting trade with Europe and Asia, through the railway connection along the Silk Road.

We promote intermodality as a tool to contribute to the decarbonisation of roads.

Information	Main Activities • Rail terminal/ Platforms / Logistics hubs / Distribution centres • Logistics operator, Other logistic services	Specialization - Agrofood sector International Markets - Strategic focus on several key international markets: Europe, followed by Asia, as well as North Africa and the Middle East. Access to these global markets through its rail terminal and logistics centre
	Customers Profile Agri-food companies. Industrial and manufacturing companies. Distributors and logistics operators. International trade companies. Transport companies. Government agencies and trade associations	Looking For Clients: companies interested in operating from the “La Melusa” Railway Terminal

Port Authority of A Coruña

About	The port of A Coruña, in the NW of Spain, with 2 separate port facilities: the Inner Port for cruise traffic, fresh fish and container cargo and the Outer Port where dry bulks and project cargo are moved. Liquid Bunks segment in the new Oil Terminal, from March 2023 discharge operations with crude oil are taking place. Also boosting “A Coruña Green Port” and its developments in energy transition and renewables, where offshore wind developments seem to be a good opportunity, due to the large availability of land for this industry that needs space for the construction, assembly and shipment of components.	
Information	Main Activities • Port, Transport operators • Port services, Warehousing • Maritime transport / Shipping lines • Loading / Unloading equipment • Smart Port solutions	Specialization - International Markets Global
Target	Customers Profile Logistic operators, ship owners, cruise lines, forwarders	Looking For New port traffics, implementation of industrial projects

Port Authority of Castellón

About	The Port Authority of Castellón is the public body responsible for the management, operation, maintenance and development of the Port of Castellón (PortCastelló). It is part of the Spanish State-owned Port System. Strategically located on the Mediterranean coast, PortCastelló is a key logistics platform and a gateway for international trade. It ranks among Spain's top 10 ports by total traffic, thanks to its high traffic volume and diversified services. PortCastelló is committed to sustainability, innovation, and competitiveness, driving economic growth in the province of Castellón and the broader Mediterranean region.	
Information	Main Activities • Port logistics • Maritime transport • Import/export operations • Industrial and energy-related traffic • Intermodal transport and value-added services	Specialization Solid bulk (notably raw materials for the ceramics and agro-food industries), Liquid bulk (chemical and petroleum products), General cargo and containers, Project cargo International Markets Europe, Africa and Middle East are key markets
Target	Customers Profile Importers and exporters, shipping companies and logistics operators, industries looking to establish within the port area, renewable energy and chemical industry companies and freight forwarders and port service providers	Looking For Attract shipping companies, strengthen logistics partnerships, promote infrastructure investments, seek strategic partners and investors, and support the port community in growing and promoting the port collaboratively.

Port Authority of Gijón

About	Located in Asturias, a region with a long-standing industrial tradition, the port of Gijon is the Spanish leader on dry bulks handling, and the ideal location for the development of new projects, with more than 70 Ha available and berthing up to 23 meters draft. Moreover, 5 weekly container services connecting APM Terminal with the major European- Atlantic hub ports, and two RoRo ramps, enhance our position as the suitable maritime gateway to North-West Spain. Fugitive emissions prevention measures and an environmental monitoring plan for port operations and terminals have been implemented since 2012.	
Information	Main Activities • Port, Rail terminal, Infrastructure operators, Logistic Platforms, Distribution centres • Customs agent, Port services • Maritime transport	Specialization Industrial and agro bulks and project cargo International Markets -
Target	Customers Profile Shipping lines, port terminal operators, exporters/importers, agents	Looking For Clients and partners

Port Authority of Las Palmas

About	The Port Authority of Las Palmas, part of Ports of Spain, is the public entity that manages the five ports of general interest in the province of Las Palmas, Canary Islands: Las Palmas, Arinaga, and Salinetas (Gran Canaria), along with the ports in Lanzarote (Arrecife) and Fuerteventura (Puerto del Rosario). Together, they handled over 31.7 million tons of cargo in 2024. Strategically located in the Mid Atlantic, Las Palmas Ports are leaders in Spain for ship repairs and serve as a key logistics hub for cargo transit to LATAM and Africa. As a crucial port for O&G, Offshore activities, and the World Food Programme, it offers global opportunities for businesses seeking efficient logistics across major maritime routes. Ports4.0 TradeTech Fund. Ongoing OPS development in various ports. RENMARINAS Las Palmas: A plug & play testing area for floating solar platforms and wave energy converters. Biofuels and alternative energies. Safe bunkering & debunkering. MARPOL-compliant port service for the reception of wastes.	
Information	Main Activities • Port, Transport or navigation infrastructure operators, Logistics platform, Distribution centre • Port services • Maritime transport / Shipping lines • Port development and operational spaces for development/berthing	Specialization Containers and reefer, General Cargo, Oversized and Heavy Cargo, Liquid Bulks, Agriculture, Fishing and Seafood International Markets Direct link with +360 Ports in +112 different countries. Ports of Tenerife

Ports of Tenerife

About

Ports of Tenerife, managed by the Port Authority of Santa Cruz de Tenerife, encompass six significant ports in the Canary Islands: Santa Cruz de Tenerife, Los Cristianos, Granadilla, San Sebastián de La Gomera, La Estaca, and La Palma.

These ports serve as crucial hubs for maritime and hinterland transport, connecting Europe, Africa, and the Americas. They are pivotal for cargo shipping, passenger travel, cruise ships, project cargo and ship repair projects.

Committed to sustainability and innovation, Ports of Tenerife are actively involved in the energy transition, aiming to become clean energy hubs specially at the Granadilla industrial port.

With strategic locations and advanced infrastructure, they offer efficient logistics, high-quality services, and significant economic contributions to the Canary Islands region.

Information	Main Activities • Port • Maritime transport • Containers	Specialization - International Markets European Union, Africa, Americas

Port Tarragona

About	The Port of Tarragona, located on Spain’s northeastern coast, is one of the leading commercial ports in the Mediterranean. Its strategic location makes it a key hub connecting Europe with North Africa. With over 2,000 years of history, the port boasts modern and versatile infrastructure, handling goods such as petrochemical products, grains, coal and agricultural products. Specialized terminals and marina, along with advanced logistics services, making it a crucial economic engine for the region and a vital link for international trade. The Port of Tarragona is committed to sustainability and offers various solutions to minimize its environmental impact. Key initiatives include: 1. Energy transition: solar panels and use of clean energy in port operations. 2. Sustainable mobility: Use of electric vehicles. Invests in infrastructure to reduce CO2 emissions. 3. Environmental management: Waste management system, water treatment and air quality control. 4. Energy efficiency: Optimizing energy consumption in its facilities and operations. 5. Circular economy: Recycling and material reuse within its operations.

Algetransit

About

ALGETRANSIT S.L., established in Algeciras, in the leading port of the Spanish port system, the meet point of major shipping routes and the bridge between Europe and Africa, this location gives us strategic position for the development of all types of logistics and Import-Export operations.

At ALGETRANSIT, we have endeavoured all our efforts into optimising the operations of the customs office, offering a comprehensive service of freight transport by any means of transportation. Our staff consists of more than 60 professionals who have broad expertise and are at your complete disposal to tailor each service to your needs. We are also customs brokers and offer advice on foreign trade and customs clearance in all national customs. With about 30 years of experience, we are a consolidated company. Our rapid and quality customs clearance services make us one of the best alternatives for the shipment of your goods. We are specialists in the fast and safe clearance of merchandise. Shipments of perishable products (fishing) and agriculture, are one of our priorities, as our main focus is on quality service. We have a clear orientation towards quality service, therefore, our priority is to offer the best response to our customer needs.

The values that govern this company are safety, efficiency and expeditiousness. By bringing it all together, we have managed to offer a top quality service and achieve our main objective, the satisfaction of our customers.

Cargo Club / Cargo Wine

About

Cargo Club Forwarders is an international freight forwarding company with over 25 years of experience in the logistics sector. Founded in 1999, our headquarters are in Barcelona, with offices also in Madrid and Valencia. We work closely with a global network of reliable agents and maintain strong relationships with major airlines, shipping lines, and road transport companies. This allows us to offer efficient, flexible, and high-quality logistics solutions tailored to our clients' needs.

Cargo Wine specializes in the national and international shipping of wine bottles, delivering directly to end consumers across the globe. Our comprehensive service covers the entire logistics chain, from collection to final delivery, using certified, secure, and sustainable packaging specifically designed for wine transport. We ensure every shipment arrives safely, efficiently, and with the care it deserves—just as the winemaker intended.

Office recycling & waste reduction, no paper policy, remote-first operations minimizing our carbon footprint, box recycling and eco-friendly packaging

Green Ibérica S.L.U.

About

Green Ibérica S.L. was founded in 1985 by the Romeu Group to represent the Taiwanese shipping company—Evergreen Line, in Spain. Green Ibérica started out in offices in Barcelona and Valencia, and over the course of the next few years it also opened new offices in Bilbao, Madrid, Alicante, Vigo, Canary Islands, and Malaga, among others. Subsequently, Evergreen chose us as their agent in Portugal, Tunisia, Morocco, and Algeria, and we opened offices in Lisbon, Oporto, Tunis, Algiers, and Oran, where we operate through associate companies. Thus, the philosophy of the Romeu Group was transmitted to Green Iberica, where we dedicate all our efforts and resources to service quality to benefit our customers.

Evergreen Line’s corporate sustainability policy is comprised of the Environmental Protection, Social Commitment, Ethical Compliance & Risk Management and Sustainable Procurement, respectively. We keep track of issues related to climate change and formulates environmental protection policies. Evergreen aligns its operating strategy with the UN Sustainable Development Goals (SDGs) and combines the sustainable management concepts of ESG to join hands with stakeholders towards common global goals.

Information	Main Activities • Customs agent, Freight forwarder, Logistics operator • Maritime transport, Rail transport, Road transport, Air transport • Containers, Refrigeration, Other	Specialization F.A.K :food, cold chain, pharmaceuticals, dangerous goods, liquids, project cargo, waste, etc. International Markets Asia, I.S.C. We coordinate land, sea and air shipments, providing comprehensive services that include multimodal transportation, warehousing, customs management and logistics consulting. We are committed to innovation and sustainability, ensuring an efficient and secure flow of goods. With a global network of agents, we adapt to our clients' unique needs, delivering swift and effective solutions across all five continents. At Logisber, we pride ourselves on our dedication to quality and customer service, establishing ourselves as a trusted leader in the international logistics industry.

Sustainability is a commitment to the planet and its people. We optimize responsible international transportation processes to reduce logistics-related pollution. We maximize resource use throughout the supply chain, transforming each shipment into a sustainable opportunity. Our focus on sustainable R&D and Good Distribution Practices (GDP) allows us to provide efficient transport that minimizes waste generation.

Logista Freight

About	Logista Freight is the Logista Group company specialised in long-distance transport, the leading integrated logistics operator in Spain and Portugal and one of the main benchmark companies in the whole of Europe. We have one of the most extensive, specialised and technologically advanced infrastructure and transport networks on the continent. We manage a fleet of more than 1,400 trucks and serve all EU countries, managing our clients locally, thanks to our own network of subsidiaries in Europe. Logista Freight is the leader in the transport of high-value goods, thanks to its state-of-the-art on-board equipment, its revolutionary integration of security and temperature control systems and its proprietary technology platform. We provide the best service to the sectors in which we are highly specialised: pharmaceutical, food & retail and high value products that require strict security protocols. We are firmly committed to sustainability in order to contribute to creating a sustainable economic system, generating stability, social commitment, growth and sustainable investment, all specified in our 3-year ESG strategic plan 2024-2026, where we set the following objectives: - Covering 90% of kms. using sustainable vehicles. - Promoting decarbonisation through the use of biofuels and increasing the use of electric vehicles.

Bleecker Technologies SL

Bleecker.tech

About	Bleecker Technologies specializes in providing solutions for companies requiring the implementation of Computer Vision technologies. We are particularly focused on the logistics sector. Our most renowned commercial product, the Bleecker System, is an automatic identification platform based on Artificial Vision, designed to facilitate the tracking and traceability of goods using cameras. Our company stands out for developing cutting-edge technology, leveraging the latest innovations in Computer Vision to create advanced and efficient solutions for our clients. Additionally, we are committed to continuous research and development, enabling us to keep innovating and offering solutions tailored to the evolving needs of the market. Unlike other technology competitors, Bleecker offers a merchandise identification solution that outperforms the competition in terms of efficiency, cost, speed of implementation and with a less intrusive technology that has a positive impact on sustainable development.	
Information	Main Activities • Traceability / RFID / Readers • Warehouse / Inventory management • Containers, Engineering	Specialization - International Markets Three main markets: other European countries, the United States, and South America
Target	Customers Profile Technology companies that provide solutions to other companies that require an identification system able to integrate different types of solutions (traceability systems, warehouse management software, etc.)	Looking For Technology companies that are leaders in one or more verticals within a specific country or international region capable of designing, integrating, installing, configuring, and maintaining technological solutions.

Claitec

About	Claitec - Part of Troax group is a technology-driven company specialising in the implementation of industrial safety and accident prevention solutions. Our product range consists of several safety systems that can be customised to suit the needs of each company. The company is the result of strategic choices we have made to date. These, in turn, are based on our mission and core values and define the way we run our business.	
Information	Main Activities • Security and protection systems, safety solutions • Warehouse / Inventory management	Specialization Safety solutions International Markets Warehouses, logistics etc
Target	Customers Profile Warehouses, logistics etc	Looking For Clients, partners and dealers

Clustag

About	At Clustag, we are leading the future of logistics with advanced RFID solutions that transform the automation and optimization of intralogistics processes. With a clear vision and deep industry knowledge, we have become a world leader in RFID, guiding companies towards a future of efficiency, control and growth. For 10 years, we have focused on integrating RFID solutions in logistics centers, improving efficiency and ensuring complete traceability from inbound goods, through order picking and validation, to outbound shipments and returns management. Clustag offers a comprehensive vision to optimize resources. We provide tailor-made solutions within the Clustag RFID ecosystem: consulting, design and development of customized RFID systems. Our team of experts ensures flawless installation of our RFID devices and Zentup data capture Suite and delivers robust after-sales support and maintenance.	
Information	Main Activities • Automation, robotics and control systems, Intralogistics equipment, RFID intralogistics systems • Supply Chain Management systems, Warehouse / Inventory management	Specialization Retail: apparel goods, sports goods, pharma, grocery International Markets Canada, USA, Mexico, Panama, Brazil, Chile, Morocco, Netherlands, UK, France, Poland, Germany, Italy, Turkey, UAE, China, Thailand, Japan, South Korea, India.

ITG Drone Solutions

About

ITG DroneSolutions is a spin-off of ITG, specializing in the development, commercialization, and consultancy of advanced drone technologies. Our solutions, including DroneSuite® and DroneSafeBox®, optimize the integration, supervision, and control of unmanned aerial systems (UAS) in critical infrastructures and professional operations. We empower research institutions, authorities, and industry leaders with cutting-edge tools for safe and efficient drone operations.

We provide the technological backbone to establish and operate advanced UAS control centres within critical infrastructures. By centralizing mission planning, real-time monitoring, operator coordination, and data traceability, our systems enable authorities and asset managers to take full command of drone operations — whether internal or from third parties. This capability is essential for scaling UAS integration, enforcing compliance, and ensuring operational safety in complex, high-stakes environments.

Information	Main Activities • Security and protection systems • Drone-delivery, Surveillance of Road, Rail, Port and Airport infrastructures	Specialization - International Markets -
Target	Customers Profile Customers who require advanced drone technologies for operational efficiency, safety, and compliance: Private Drone Operators & Service Providers, Port Authorities & Critical Infrastructure Operators, Industrial & Logistics Companies, Research Institutions & Universities, Public Safety & Government Agencies. Moinsa

About Moinsa is a leading company specializing in logistics and supply chain solutions, offering a wide range of services to optimize operational efficiency. One of its key offerings is its Return Center, which is designed to streamline the returns process for businesses, ensuring fast and efficient handling of returned products. With state-of-the-art technology and a dedicated team, Moinsa’s Return Center minimizes turnaround times and reduces costs, enhancing customer satisfaction and driving sustainable growth. This facility is equipped to manage a variety of product types, providing tailored solutions that help businesses maintain optimal inventory levels and improve their reverse logistics strategy. We mitigate the impact of our operation on the environment, optimizing the use of our resources, seeking energy sources that reduce emissions, favoring the use of materials of sustainable origin, reducing, recycling and reusing the waste generated by our activity. We measure and record our impact in order to reduce it. We disseminate among staff and collaborators responsible consumption practices.		
Information	Main Activities • Automation, robotics and control systems, Intralogistics equipment (conveyors, storage, palletization, etc.), Loading / Unloading equipment, Packaging / Labelling systems, Traceability / RFID / Readers, Ironing and bagging tunnels	Specialization Returns center, RFiD, WMS and Aerial Transporter International Markets Extensive international experience, working closely with companies from various countries. Partners in Bangladesh, Colombia, Poland, UK and Portugal

Smartlog Group

About

We offer unique intralogistics solutions and services, focused on personalised attention and innovative technologies. With this objective in mind, we combine technologies and perform exhaustive studies to be your solution.

With years of continuous growth, we operate automating logistics centres and warehouses to boost efficiency, productivity, innovation and sustainability. Our headquarters, along with 10 other companies that make up the Group, are home to more than 150 committed professionals.

Our purpose is to forge sustainable, resilient logistics focused on the well-being of people and their environment, and to this end, we promote values such as entrepreneurship, commitment, proximity, proactivity, enthusiasm and integrity.

All our solutions are sustainable, not only by requiring very little energy (even 10 robots consuming the same amount as a Hoover), but because we manage to make solutions that are sustainable over time in terms of ergonomics of the workers or costs.

Information	Main Activities • Automation, robotics and control systems, Intralogistics equipment (conveyors, storage, palletization, etc.), Traceability / RFID / Readers, Mobile robotics • Warehouse / Inventory management	Specialization - International Markets Europe (France, Portugal), LATAM and MENA.
	Target Customers Profile Any company from any sector that needs to improve efficiency, wants to increase its storage capacity or wants to reduce operating costs and has a warehouse.	Looking For Clients

Allread

About

AllRead is a deep tech spin-off founded in 2019 with the mission to automate operational processes in the logistics and port sector by incorporating intelligent reading systems into global supply chains. Our value proposition focuses on enhancing clients' operational efficiency and data management through precise, automated extraction of alphanumeric text in complex operational environments, replacing repetitive manual tasks and outdated technologies with immediate information processing. Our core business centers on an artificial vision software that automates processes. Our proprietary reading solution is based on a convolutional neural network architecture, providing machine learning models capable of identifying, tracking and monitoring assets and goods across intermodal logistics environments.

In under five years, AllRead has secured clients among Spain's main ports (Barcelona, Algeciras, Bilbao, Valencia) and railway operators like Renfe Mercancías, CargoBeamer and Alsa Rail, along with clients across 12 countries.

Information

Main Activities

- Automation, Traceability / RFID / Readers
- Smart Port solutions

Specialization

Container handling, assets traceability, access control automation.

International Markets

Main markets: Europe and LATAM, specifically in Germany, France, Italy, Chile, Argentina and Bulgaria. Exploring further internationalization within these continents

Target

Customers Profile

Clients within the port and logistics ecosystem: port authorities, terminal operators, intermodal operators, and railway operators

Baobab Soluciones

About

Baobab is a software company specialized in Decision AI. We apply a complete mathematical toolbox (predictive models, optimization, simulation) to enrich decisions from your daily operations or the strategic planning. Our customized algorithms complement your in-house expertise related to logistics & supply chain: warehouse layout & operations, transport optimization, supply chain decision making, stock management, production scheduling...

Baobab is your key partner to identify, prioritize, develop and deploy AI use cases that boost your productivity and enable big savings.

Optimization is the key driver to sustainability. Release the power of mathematics and make operations efficient as the best way to reduce your carbon footprint.

Information	Main Activities Enabling technologies (AI, IoT, location services, big data, blockchain, etc.), Integrated Supply Chain Management systems, Integrated Traffic Management Systems (ITMS), Urban mobility, Smart Port solutions, Transport control / DP Systems (Dynamic Positioning)	Specialization - International Markets Spain / Europe / Latam
Target	Customers Profile Utilities, Oil & Gas, Manufacturing, Retail, Logistics, Pharmaceuticals, Telco, Finance... About

Gandolapp is a technology company transforming the road freight sector through AI-driven voice solutions. Our platform automates communication between truck drivers and logistics operators, improving efficiency, safety, and sustainability. With tools like Driver, a hands-free voice assistant for drivers, and Fleet, a real-time tracking system without additional hardware, we help businesses optimize operations and reduce costs. Our mission is to make logistics smarter, more connected, and environmentally friendly.

Gandolapp is committed to making road freight transport more sustainable by reducing emissions and improving operational efficiency. Our solutions contribute to sustainability in several ways: Fuel and Emissions Reduction, Paperless Operations, Less Communication Overhead. By integrating AI-driven voice technology into logistics, we make sustainable operations easier, helping companies achieve greener and smarter transport.

Information	Main Activities Enabling technologies, Location services, Transport control / DP Systems (Dynamic Positioning)	Specialization General cargo, dangerous goods, pharmaceuticals, reefer cargo, container road transport International Markets Spain, France, Germany, Mexico and USA, with growing adoption in other European markets
Target	Customers Profile Transportation and logistics companies, ports, freight forwarders, and shippers looking to streamline operations and enhance visibility. Imperia

Evolve your supply chain!

Optimize all your processes and multiply your efficiency

About

Imperia is a pioneering company in software solutions for SMEs, specializing in supply chain optimization. Our SaaS tool, “Supply Chain Planning,” uses advanced data analysis and customizable plugins to adapt to each client’s specific needs. We offer a solution with no implementation costs or long-term commitments, setting us apart in the market with our accessibility and flexibility. We help businesses improve operational efficiency and sustainability, facilitating their transition to Industry 4.0.

Imperia is committed to sustainability and offers solutions that promote efficient energy use, integration of renewable energy sources, and minimization of environmental impact. Our “Supply Chain Planning” tool helps businesses reduce their carbon footprint by optimizing transportation routes, improving energy efficiency, and reducing waste throughout the supply chain.

About

The Basque Mobility and Logistics Cluster, MLC ITS Euskadi, is a private non-profit association founded in 2005. It works in the fields of people mobility, freight logistics and related industry developing transport products, solutions, services and specific technologies (ITS – Intelligent Transport Systems), which make mobility increasingly safer, more efficient, sustainable and technologically advanced.

The Cluster is the sectorial reference group within the framework of the Cluster Policy promoted by the Basque Government through SPRI, the Basque Business Development Agency. It is also part of the Network of Innovative Business Clusters, under the Ministry of Industry of the Government of Spain; and is qualified in the “Bronze Label” category for Excellence in Cluster Management, by ESCA, European Secretariat for Cluster Analysis.

Centro Español de Logística

About

Since 1978, the Centro Español de Logística (CEL) is the first national and international reference association for supply chain management in Spain. It is focused on providing value to its members through knowledge and innovation in logistics management. To this end, it acts as a benchmark in the sector thanks to the research, compilation, selection and updating of the most innovative logistics management techniques and emerging business trends in the global economy. It participates in the dissemination and constant diffusion of know-how, innovation and best practices. It brings together logistics organizations and professionals in analysis forums to exchange and detect the best practices and management techniques related to the supply chain.

Cluster da función loxística de Galicia

About

We are an organization that enhances the competitiveness of the logistics sector in Galicia by promoting innovation, digitalization, and sustainability in the supply chain. We bring together companies, entities, and research centers to improve logistics efficiency, fostering collaboration among key stakeholders. Our goal is to position Galicia as a benchmark in advanced logistics, facilitating internationalization and optimizing processes in strategic sectors such as industry and commerce.

We are developing an innovative tool designed to minimize the impact of the carbon footprint by optimizing processes and promoting more sustainable practices.

Clúster Marítimo de Canarias

About

The Canary Islands Maritime Cluster is a non-profit regional association whose primary objective is to promote the development and international competitiveness of the Canary Islands' Marine Maritime Sector, while at the same time raising the business, economic and social fabric of the Canary Islands through the integration, creation, strengthening and sustainability of companies and institutions that are within the value chain of the marine maritime sector, promoting their international presence and raising the technological and innovative level of all the agents involved, aligned with development policies and social demands.

The Cluster's strategy to achieve this goal is based on values such as cooperation, commitment, communication and competitiveness.

Escola Europea - Intermodal Transport

About

The Escola Europea Intermodal Transport is a training center and reference point for sustainable and intermodal transport and logistics. Its main goal is to promote innovative courses on sustainable logistics and transport to support the development of a sustainable transport system.

The Escola combines theory and practice with real on-site experiences or simulated scenarios, allowing participants to apply what they have learned and retain the concepts to use them effectively. It offers a wide range of technical courses specializing in maritime and rail intermodality, logistics trends, temperature-controlled freight transport, energy transition, and the Port Virtual Lab, a virtual port community laboratory.

The Escola's partners include the Ports of Barcelona, Rome, Genoa, Palermo, and the shipping lines Grimaldi Lines and GNV.

All trainings include a chapter for calculation of CO₂ equivalent emissions and external costs.

Itene Research Centre

About

ITENE: Advanced Technology for a More Efficient, Greener, and Connected Supply Chain

ITENE is a leading technology center in the transformation of logistics processes through cutting-edge technologies. Its approach combines operational efficiency, green practices, and digitalization to optimize the entire supply chain.

Headquartered in Valencia, ITENE operates a 12,000 m² facility that includes state-of-the-art laboratories and pilot plants. The Research Center develops and implements solutions based on artificial intelligence, predictive algorithms, IoT, digital twins, and computer vision. These tools enable demand forecasting, route optimization, process automation, and improved decision-making in complex logistics environments.

ITENE also promotes greener logistics through smart distribution models and technologies that reduce the environmental impact across the supply chain. The integration of AI agents allows for intelligent process orchestration, real-time adaptations, and greater operational efficiency

The center also features a transport simulation laboratory certified under 22 ISTA protocols and recognized by Amazon as an APASS member. This enables the optimization and validation of packaging solutions tailored to real distribution conditions.

Logistop. Plataforma Tecnológica en Logística Integral, Intermodalidad y Movilidad

Logistop

About

Logistop is a public-private collaboration forum that brings together the main stakeholders in the logistics sector with the goal of defining and promoting a shared R&D&I strategy, aligned with technological challenges and market demands.

With over 20 years of experience driving logistics innovation projects in Spain, LOGISTOP has established itself as the leading forum for energizing such initiatives.

It serves as a space for cooperation and knowledge transfer where all supply chain agents converge: companies, logistics operators, universities, academic institutions, public administrations, business organizations, and technology centers.

Uno. Organización Empresarial de Logística y Transporte

About

UNO represents the interests of companies that design, organize, manage and control the processes of one or more phases of the supply chain: logistics operators, parcel companies, national and international couriers, transport, storage, distribution, final packaging, air freight, urban distribution of goods, logistics departments of manufacturers and distributors and, ultimately, any player that values transport and logistics as a key element in their business strategy.

It has more than 350 partners who are committed to improving their competitiveness, within a framework of legal security and free competition.

World Wine Cargo Alliance (WWCA)

About

World Wine Cargo Alliance (WWCA) is an exclusive global network for freight forwarders who specialize in the transport of wine, beers and other alcoholic beverages. We help create synergies connecting trusted logistics professionals worldwide for a better balance and stronger opportunities without market oversaturation. Members benefit from 24/7 communication channels, a payment protection program, and two major events each year: an international exhibition and our annual conference, held in a renowned wine region around the world.

Information

Main Activity

- Global Network, Business Association

Customers Profile

Freight forwarders that specialize in the transportation of wine, beer, and other alcoholic beverages, or those looking to develop and grow their expertise in this niche market. We welcome logistics professionals who are committed to quality, reliability, and building strong international partnerships within the alcoholic beverage sector.

Looking For

Freight forwarders with proven experience—or a strong interest—in handling the transport of wine, beer, and other alcoholic beverages. Our ideal partners are companies eager to grow within this specialized logistics segment, committed to service excellence, and open to building long-term, collaborative relationships with trusted agents worldwide.

Specialization

Wine, beer, sprits and other alcohol beverages. Network creation and partner matching, international exposure and business development support, payment protection program, 24/7 internal communication channels
