BIOTECH FROM SPAIN

Wednesday, October 11th, 2023 (12:05 - 12:35h.)
Presentation Stage C
1. ASEBIO
2. CREB UPC | XARTEC SALUT
3. FUNDACION MEDINA
4. INVES BIOFARM
5. LEVPROT BIOSCIENCE
6. NOSTRUM BIODISCOVERY / BSC
Growing number of companies: 898 strictly biotech and + 4,000 bio-based (use) firms.

50% of Spanish biotech firms are dedicated to human health and 39% to agro-food.

Generating economic growth: 13,000 M€ turnover, 1.1% of Spanish GDP.

Dynamic creation of highly qualified jobs: Over 118,000 people.

Increasing private investment: 142 M€ in 2022.

R&D investment leaders: + 1,000 M€, 5% of total national investment.

Spanish Biotech Pipelines: + 1,300 health, agri-food and industrial products in development.

Strong leadership in the development of innovative drugs: Cancer, CNS, Genetic, Infectious and Autoimmune diseases, etc.
Companies & sectors

**ASEBIO**
Spanish Bioindustry Association.

**CREB UPC | XARTEC SALUT**
Human Health (Diagnostic - Vaccinations), Human Health (Therapeutics), Laboratory and diagnostic services, E-health, Robotics.

**FUNDACION MEDINA**
Human Health (Therapeutics), Animal Health, Agrofood (agriculture, livestock, farming, food and forestry), Bioprocesses, biofuels, biomaterials, Cosmetics.

**INVESBIOFARM**
Human Health (Therapeutics), Cosmetics Biotechnology.

**LEVPROT BIOSCIENCE**
Human Health (Diagnostic - Vaccinations).

**NOSTRUM BIODISCOVERY / BSC**
Human Health (Diagnostic - Vaccinations), Human Health (Therapeutics), Animal Health.

BIOJAPAN 2023
共同出展者
AseBio, the Spanish Bioindustry Association, brings together and represents the interests of companies, associations, foundations, universities and technology and research centres that work in the field of biotechnology in Spain.

We collaborate closely with regional, national and European governments, as well as with social organisations that are committed to science and the use of biotechnology to improve people’s lives and promote environmental sustainability, economic development and high value-added employment.

BIOSPAIN, GREEN INNOVATION FORUM.
The Xartec Salut network, led by CREB UPC, is made up of 81 research groups that belong to 23 different institutions. It aims to be a catalyst for R+D+I in the field of HealthTech by:

1. Fostering the exchange of knowledge between research groups, institutions, hospitals and companies.
2. Promoting company creation and new career opportunities.
3. Offering more efficient instruments for technology transfer.

Xartec Salut provides technological services in different HealthTech areas through the groups that make up the network.
Internationally recognized leader in drug discovery from natural products (NPs) proposing: 1) new NPs discovery from one of the world’s most diverse microbial collections (190K strains) to mine new genes and unique enzymes; 2) unique NPs libraries (200K extracts) to discover neglected and novel scaffolds unknown in synthetic libraries; 3) State-of-the-art HT screening platform; 4) Extensive expertise in NP’s chemistry and analytics (e.g. compound isolation and structural elucidation, chemical characterization of extracts,…); 5) early preclinical safety evaluation of new leads.
The aim of INVES BIOFARM is to research dermatological diseases. Our finished products are manufactured under sterile conditions in ISO 5 & 7 rooms. We work under ISO 13485, 22716 and 9001 standards.

1. Biotechnological application patent extendable to more proteins.
2. Biotechnological ingredient for dermatological application.
3. We have granted protein stabilization patents in Japan, USA, Mexico, Colombia, Panama and Russia
4. As a result of the patent we developed the following dermatological products: Atopic Dermatitis, Wounds, Acne, Gynecology, Healings, Burns, Whitening
5. Cosmetic line for home and professional treatment. Class III hyaluronic acid injectable medical devices.

Levprot provides high-quality recombinant proteins and enzymes produced using innovative yeast cell-based technology. Our products are 100% prokaryotic DNA-free and animal-free, making them ideal for the IVD and biopharma industries. We produce raw materials for techniques from qPCR and rapid tests to NGS, CLIA, and blocking buffer solutions. With our dedication to sustainability, you can rely on us to deliver innovative, robust and environmentally friendly solutions for your raw material needs.
NBD is a company with three areas of focus: Drug Discovery, Protein Engineering and Nucleic Acids. In particular, we have developed strong (international-level) expertise in early-stage small molecules Drug Discovery, ADMET, Protein/Enzyme Engineering, in-silico Directed Evolution, Nucleic Acids, mRNA, Peptides, GPCRs, TPD, Oligonucleotides, and Vaccines. We provide customer-tailored solutions based on our state-of-the-art proprietary combined with the latest development on AI. We use best in-class Molecular Modelling for data augmentation and fine-tuning of dedicated machine-learning algorithms.
