## A BLUE THING IN THE CLOUD ↗

**Javier Longares Abaiz, CEO**  
[j.longares@ablueethinginthecloud.com](mailto:j.longares@ablueethinginthecloud.com)  
 +34 649 30 00 00

A Blue Thing in The Cloud turns connected-product ideas into market-ready hardware. We design custom electronics PCBs, embedded firmware and cloud-ready IoT systems, covering architecture, component selection, prototyping, testing, certification support and industrialization. Our team works with BLE, WiFi, UWB, LTE-M, NB-IoT, sensors, low-power devices and several RTOS, helping companies reduce technical risk, shorten development cycles and launch reliable smart products faster. We are design partners of Nordic Semiconductors and UWB partners of Qorvo.

Supported by:

*When Technology becomes Art*

### Product & Services

A Blue Thing in The Cloud provides turnkey electronics engineering services, mainly PCB design and embedded firmware for connected products. At VivaTech, we will present BlueModule, a family of compact solderable IoT modules combining BLE, WiFi and UWB, with variants such as BLE+WiFi, BLE+UWB and triple-radio. Our services help companies accelerate RF hardware, Zephyr/Nordic SDK firmware, wireless connectivity, prototyping and industrialization. The RF certified modules provide BLE & WiFi connectivity and also ready to use Real Time Location Services applications through Bluetooth Channel Sounding and UWB algorithms.

## ACCIÓ - GOVERNMENT OF CATALONIA ↗

**Albert Torruella, Senior consultant**  
[atorruella@gencat.cat](mailto:atorruella@gencat.cat)  
**+34 607 49 33 18**

ACCIÓ is the Catalan Government agency dedicated to improving the competitiveness and growth of Catalan companies. It supports businesses in innovation, internationalization, business transformation, and investment attraction, offering services, funding programmes, and strategic guidance to help companies grow, adapt to change, and compete globally.

*Driving competitiveness for Catalan companies*

### Product & Services

ACCIÓ presents a range of services aimed at supporting business competitiveness and growth. These include programmes for innovation and technology development, internationalization and export support, business transformation, access to funding, and investment attraction. Through personalized guidance and public support instruments, ACCIÓ helps companies expand, innovate, and strengthen their global position.

## AGROLINERA ↗

**Verónica Menéndez Rodríguez, CEO**  
[vmenendez@agrolinera.com](mailto:vmenendez@agrolinera.com)  
**+34 627 56 19 03**

Agrolinera is a technology company that digitalizes the collection and valorization of distributed organic by-products in rural communities. Starting with dairy whey and livestock slurry, we help turn hard-to-manage waste streams into traceable resources for circular bioeconomy uses. Our approach combines equipment, data and pre-treatment processes to improve traceability, quality control and logistics in fragmented environments.

Supported by:

*Turning distributed organic waste into traceable value*

### Product & Services

Agrolinera designs, builds and operates IoT-based systems for valorization plants, public administrations and rural communities that need to turn waste into a stable, predictable and reliable feedstock supply. Our services combine connected equipment and a cloud platform to enable traceability, quality control and efficient logistics. We also assess local resource availability and design the right solution for each territory.

## AITACA ↗

**Nicolas Moreno de Palma, Chief Business Officer**  
**sales@aitaca.io**  
**+34 653 37 49 42**

Aitaca solves the issue of online size recommendations with a user-driven approach, thanks to computer vision & AI. Our tech instantly delivers precise size recommendations for jewelry - soon watches as well - using just a photo, bringing the in-store experience online. Boost confidence & conversions. Reduce complexity & returns. Decide with real data.

Supported by:

## *Solving the online sizing problem with computer vision & AI*

### Product & Services

Our product is an ecommerce optimisation tool based on our web widget for size recommendations. From that, the benefits are many:

- Gathering data about the real customer demand for sizes.
- Assessing and solving the offering-demand gap.
- Converting more sales and increasing the Average Order Value.
- Reducing returns.
- Improving the customer experience, sustainability, etc.

Our technology already powers the website of top brands in the space such as Astrid & Miyu, Daniel Wellington and Monica Vinader. Will your online store benefit from it next?

**Patricia Ruiz von Felten, Market Analyst**  
[asturex@asturex.org](mailto:asturex@asturex.org)  
**+34 601 80 32 43**

ASTUREX is the Trade Promotion Agency of the Principality of Asturias (Spain). We support Asturian companies in their international expansion through market intelligence, export promotion services, international business development, trade missions, strategic consulting and access to global opportunities. ASTUREX also promotes Asturias as an innovative and competitive business ecosystem, connecting startups, scaleups and technology companies with international partners, investors and innovation networks.

## *Connecting Asturian Innovation with Global Opportunities*

### **Product & Services**

ASTUREX attends VivaTech together with innovative Asturian companies, supporting their international growth, visibility and connection with global partners, investors and business opportunities. Our goal is to help Asturian startups and tech companies strengthen their international presence and unlock their global potential.

## BEYOND CX ↗

**Luis Guillermo Pardo Fonseca, CEO**  
[info@beyondcx.ai](mailto:info@beyondcx.ai)  
**+34 696 41 28 56**

BEYOND, through its Alan Agentic Systems platform (Beyond CX), delivers a new generation of artificial intelligence capable of understanding, reasoning, and autonomously executing complete business processes. Its technology connects specialized cognitive agents with enterprise systems such as CRM, ERP, and customer service channels, enabling real-time end-to-end operations. Rather than simply automating task, BEYOND helps organizations become more agile, efficient, and autonomous in complex industries like healthcare, banking, and insurance.

*Designed to think.  
Built to act*

### Product & Services

BEYOND develops AI solutions designed to transform customer service operations, back-office functions, and critical business processes. Through its Alan Agentic Systems ecosystem, it deploys intelligent agents capable of understanding information, making decisions, and executing actions in real time. Its products include Alan Customer Experience, focused on enhancing customer interactions, and Alan Process Intelligence, designed for complex back-office processes. Together, they help organizations connect systems, reduce operational friction, and scale workflows with a more intelligent and outcome-driven approach.

## BHYBRID SAAS BY ONHOFF ↗

**Carlos Bustos, CEO & Founder**  
[carlos.bustos@onhoff.com](mailto:carlos.bustos@onhoff.com)  
 +34 696 44 69 96

Bybrid is a proprietary SaaS creating a new software category. Help to manage Brands solving several structural problems in international organizations. Organize and manage staff and sales teams digitalization. Provides a guide to employees to project the brand and to manage relationships in multiple countries and languages. Give new interaction skills to employees saving from 35 to 200h of time or more each year by reducing information overload, enabling Glocal Brand People Governance with rules and policies improving effectiveness and collaboration.

*Improve how sales teams interact reducing the digital-age divide*

### Product & Services

ONHOFF presents a system that in less than 30 days combining Technology, Consultancy and Training generate time savings to management and sales teams improving their skills. The product offer includes several integrated systems to organize, structure and distribute content by country and language, delivering the right information to each employee at the right time using our HAPIS -Hybrid Advance Personal Information System- that can be used as a DigitalCard and as a door to relate with stakeholders. The system generates new metrics, productivity gains; manage networking, turnover, d-rights being a complement to CRM.

## BIG SUR VENTURES ↗

**Valentina Delgado, Investor Relations**  
**Jose Miguel Herrero, Managing Founder**  
**hello@bigsurventures.vc**  
**+34 637 14 16 16**

Founded in 2012, Big Sur Ventures is a Madrid-based venture capital firm and the leading Deep Tech seed investor in Spain. The firm backs Spanish and European seed-stage companies across two core themes: Deep Tech (advanced engineering and industrial technologies, energy transition, AI, and advanced hardware) and the Power of the Internet (AI-native software, cybersecurity, and expert systems). The firm typically leads early rounds and supports founders with hands-on early-stage value creation.

## *Big Sur Ventures*

### Product & Services

We are a venture capital firm raising international capital to invest in high-potential Spanish early-stage companies. We provide foreign investors with access to Spain's innovation ecosystem through a curated portfolio of seed-stage opportunities. Our focus is on identifying high-quality founders, supporting early growth, and connecting international capital with attractive long-term value creation in the Spanish market.

## BIOHOME ↗

**Pierino Puigsubirà, CEO**  
[info@biohome.cat](mailto:info@biohome.cat)  
**+34 633 60 32 26**

Smart Biohome develops an innovative Bioenergy-as-a-Service (BaaS) ecosystem that transforms residential and commercial heating into smart, sustainable biomass solutions. Through the integration of Biolevel, Bioplace (Spanish Business Award 2026 by EU Business News), and Biotrade, we enable efficient biomass supply, automated pellet management, real-time monitoring, and optimized local bioenergy valorization — delivering lower costs, reduced emissions, and full decarbonization of home energy. Award-winning Catalan green-tech startup backed by Acció.

## *Pain-free biomass heating*

### Product & Services

Smart Biohome presents its Bioenergy-as-a-Service (BaaS) ecosystem for smart and sustainable biomass heating.

We showcase the integrated platform:

- Biolevel: Real-time pellet level monitoring using smart sensors.
- Bioplace: IoT-connected bioenergy marketplace for biomass trading and local valorization.
- Biotrade: Generation and monetization of climate credits from sustainable biomass.

Together they enable automated management, cost reduction, lower emissions, and full decarbonization of home energy.

Award-winning Catalan greentech solution backed by Acció and EU Business News.

## BYTETRAVEL ↗

**Hadia Bukhtiar, Assistant CEO**  
[info@bytetraavel.com](mailto:info@bytetraavel.com)  
**+34 640 19 35 68**

BYTETRAVEL S.A. is a Spanish TravelTech company specializing in ancillaries (auxiliary services) for tourists and business travelers worldwide. We aim to be the leading company providing these complementary services or ancillaries in an efficient and reliable way through the mass use of technology. With more than 3.2 million registered users and 5,200 partners, the company serves clients from all 5 continents.

*ByteTravel:  
Change the way you travel*

### Product & Services

ByteTravel offers four services that remove friction on every step of international travel. Its journey began with Visagov, an online service for processing tourism and business visas in +70 countries. It was followed by Roamic, a travel eSIM enabling mobile internet in over 190 countries. ByteTravel's latest services were launched in 2025: Globely, an insurance assistance service; and VIP Lounges, a platform to book premium airport lounges in 1.800 airports across 135 countries.

## CALPECH ↗

**Yuriy Budyk, CEO**  
**info@calpech.com**  
**+34 667 88 03 91**

Calpech is a deep-tech spin-off from the University of Alicante developing iron-based nanomaterials from agricultural waste. Our technology enhances biogas production, enables environmental remediation, and supports circular economy models. By combining advanced materials with data-driven services, we help industrial clients optimize processes, reduce emissions, and unlock value from waste streams.

Supported by:

*Turning waste into energy  
with nanotechnology*

### Product & Services

Calpech presents a multifunctional nanotechnology-based additive for anaerobic digestion that boosts biogas yield, removes contaminants (e.g. H<sub>2</sub>S), stabilizes reactors, and improves digestate quality. We also offer advanced laboratory services, process optimisation, and tailored consulting for biogas plants. Our solutions are validated in multiple full-scale facilities, delivering measurable performance improvements.

## CEDRION ↗

**Enrique Medina, CEO**  
**e.medina@cedrion.com**  
**+34 676 05 92 84**

CEDRION disrupts biosecurity with patented ionic wind and cold plasma technology. We replace mechanical fans and filters with solid-state air management, achieving 99.9% pathogen inactivation (CSIC validated) in a single pass. Our systems are silent (0 dB), maintenance-free, and reduce energy and weight by 50%. Tailored for BSL2 labs, ambulances, and agrifood, we provide mission-critical air purity without chemicals or waste. Deep Tech at TRL 8, engineering a filterless future.

Supported by:

*The most effective way  
to kill viruses, bacteria & pollutants*

### Product & Services

We present KIRION, the most effective biosecurity tech for Healthcare, Labs, and Ambulances. Using patented Cold Plasma & Ionic Wind, KIRION achieves a 99.99% pathogen kill rate (virus/bacteria) validated by CNB-CSIC in a single pass. Available as Stand-alone units or integrated into HVAC systems, it provides: 0 dB Absolute Silence: No moving parts or fans. Zero Waste: Filterless technology eliminates HEPA maintenance costs. Efficiency: 40W consumption and 15% energy saving in HVAC by reducing pressure drop. The silent, maintenance-free future of air quality.

## CIDTECH SIMULATIONS ↗

**Jose Maria Cid, CEO**  
**jose@cidtech.io**  
**+34 637 12 07 46**

CIDTECH Simulations helps industrial companies visualize, validate and communicate complex production systems through industrial simulation, digital twins and immersive 3D/VR environments. We transform CAD layouts, machinery concepts and factory processes into interactive tools that support engineering decisions, sales presentations, training and process optimization.

*Industrial simulation to visualize, optimize and convince*

### Product & Services

At VivaTech, CIDTECH Simulations will present industrial simulation and virtual environment solutions for manufacturers, integrators and engineering teams. Our services include 3D factory visualization, digital twin-inspired models, VR/interactive environments, point cloud integration, layout validation and technical storytelling tools. We help companies test industrial concepts, present machinery, improve communication with clients and reduce uncertainty before investing in physical systems.

## CLAVE CAPITAL ↗

**Santiago Lozano, Partner. Funds Director.**  
**lozano@clave.capital**  
**+34 608 92 77 73**

We are a venture capital firm focused on deep tech and technology transfer investments, with a primary emphasis on healthtech and industrial innovation. We currently manage over €100M in assets under management (AUM).

## *Deeptech and Tech transfer investors*

### Product & Services

We manage several tech transfer and deep tech funds focused on preseed and seed rounds. We invest at the pre-seed and seed stages, with the capacity to participate in follow-on investments through Series A. Our initial investment tickets range from €500K to €1M, with total potential investment per company reaching approximately €3M over time. We can act as lead investors in Spain, while in other European countries we typically prefer to participate as follow-on or co-investors alongside local leads.

## COMEXSOFT ↗

**José Manuel García, CEO**  
[rebecca@comexsoft.com](mailto:rebecca@comexsoft.com)  
**+34 618 71 56 78**

ComexSoft develops ComexPro, a SaaS competitive intelligence platform for the food and FMCG sectors. It helps manufacturers, distributors and retailers make faster, data-driven decisions on pricing, assortment, promotions, innovation and market expansion. Its proprietary neurosymbolic engine combines intelligent scraping, AI, computer vision and real-time market data to benchmark products beyond EANs, detect trends and opportunities, reduce manual analysis and turn complex market signals into actionable business insights at scale.

*Turning FMCG market data into actionable intelligence*

### Product & Services

ComexSoft will present ComexPro, its SaaS platform for competitive intelligence in food and FMCG. The platform monitors prices, promotions, assortment, product attributes and market trends in real time across retailers, e-commerce and public sources. It includes benchmarking beyond EANs, AI-based product matching, OCR for labels and packaging, consumer insight analysis, dashboards, automated reports, export intelligence and modules for pricing, innovation, marketing and assortment optimization.

## DANAЕ UROGENOMICS ↗

**Marta Dueñas, Founder**  
[marta.duenas@durogenomics.com](mailto:marta.duenas@durogenomics.com)  
 +34 637 74 50 36

Danae Urogenomics is a biotechnology company focused on precision diagnostics for women’s health and urogenital diseases. By combining advanced genomics, molecular biology, and AI-driven analysis, Danae develops innovative solutions for the early detection, prevention, and personalized management of infections and other urogenital conditions. The company aims to improve clinical outcomes, optimize treatments, and advance personalized medicine through cutting-edge scientific research and technology.

*Science in Urology,  
Precision in Care*

### Product & Services

Danae Urogenomics presents a precision oncology platform focused on genitourinary tumors, with a strong specialization in bladder cancer. The company showcases three innovative molecular diagnostic products for the detection, monitoring, and management of bladder cancer based on non-invasive urine testing systems. Danae also develops therapy patient stratification solutions through therapy response prediction, enabling more personalized treatment decisions and improved clinical outcomes in uro-oncology.

## DISTRIPHA ↗

**Luis Alves Ferreira, CSMO**  
[hola@distripha.com](mailto:hola@distripha.com)  
**+34 697 52 03 20**

Distripha is an AI-driven eHealth platform that transforms how pharmacies manage inventory and procurement. Our intelligent solution saves pharmacists up to 2 hours daily while reducing dead stock by 75%, enabling them to focus on what matters most: patient care. Distripha's proprietary AI engine analyses sales patterns, seasonality, and market trends to generate intelligent daily order proposals, optimizing stock rotation and preventing stocks out.

## *Powering Pharmacies Stock with AI*

### Product & Services

Distripha is an AI driven solution for pharmacies to manage and optimize their inventory and procurement process. With Distripha, the pharmacist gets intelligent daily order proposals based on demand predictions using machine learning algorithms, stock analytics in real time, order calendar and smart programming, and other features. The goal is to optimize stock rotation, to prevent stocks out, to reduce CO<sub>2</sub> emissions and to automate the procurement process.

## LIFESOME THERAPEUTICS ↗

**Ana Bouchet, CEO**  
[anabouchet@lifesomeTx.com](mailto:anabouchet@lifesomeTx.com)  
 +34 688 65 98 91

Lifesome Tx is developing the next generation of therapeutic nanocarriers for the entire pharmaceutical industry. Through non-exclusive licensing, Lifesome will enable a wide array of anticancer drugs to be delivered more efficiently and affordably — including generic drug reformulations that can dramatically extend the lifecycle of proven therapies. The company's mission is to provide an improved drug delivery technology, transforming the horizon of treatment options for indications currently underserved by available technologies.

*Developing the next generation of therapeutic nanocarriers*

### Product & Services

Lifesome Therapeutics is presenting the proprietary technology platform Ohmline: a therapeutic nanocarrier for synergistic gain of efficacy combination with any cancer chemotherapy. Ohmline is a patented lipid nanocarrier that not only transports therapeutic payloads but also directly inhibits SK3 ion channels, a key driver of tumor growth and metastasis. Because SK3 channels are highly overexpressed in many cancers yet remain scarce in healthy tissues, Ohmline achieves a uniquely selective dual mechanism: targeted drug delivery paired with intrinsic suppression of tumor proliferation and metastatic spread.

## LOOMEE HEALTH ↗

**Francisco Jose Tavira Sanchez, CEO**  
**f.tavira@loomee.health**  
**+34 605 51 32 55**

LoomEE Health is a B2B SaaS platform for mental health professionals, paired with a patient app. We digitalize the therapeutic process to improve resource allocation and clinical monitoring. Our solution focuses on the professional-patient tandem rather than an isolated app. By using clinical data and proprietary algorithms, we identify risk indicators and personalize interventions, allowing professionals to save time and increase productivity.

*Intelligent tools to streamline therapist's clinical operations*

### Product & Services

We present our dual platform: a clinical dashboard for professionals and a mobile app for patients. The software features a library of over 600 evidence-based therapeutic resources focused on anxiety, mild depression, grief, and self-esteem. It automates clinical tasks, reducing administrative time by up to 40%. Additionally, we highlight our AI assistant, designed to detect linguistic patterns and provide intelligent alerts to support clinical decisions (medical device class IIa in progress).

## METASCAN ↗

**Dirk Hornung, CEO**  
**hello@metascan.es**  
**+41 786 27 86 40**

Metascan is a deep-tech startup based in Barcelona. Metascan creates real human synthetic data. It consists in 3D human datasets to train AI, AR/VR, Gaming, and Computer Vision systems. They are experts in 3D scanning, having developing customised hardware and software that create digital twins applicable to various sectors such as Fashion Tech, Health Tech and VFX. The scans are high fidelity and all data acquisition is managed ethically and strictly complies with GDPR standards.

## Human Synthetic Data

### Product & Services

At Metascan we provide human synthetic data for companies that train AI, CV, AR/VR and Gaming. Also we build custom 3D scanning hardware and software. Currently we have a professional photogrammetry 3D scanner for creating digital twins. Applicable to various sectors such as Fashion Tech, Health Tech and VFX.

## METTIS AI ↗

Filippo Brunelleschi, CEO

filippo@mettis.ai

+34 619 71 67 23

Mettis AI automates the evaluation of driver behavior by analyzing real-time data from vehicle sensors and cameras, both inside and outside the car. Unlike existing solutions that monitor isolated metrics, Mettis delivers a comprehensive, standardized assessment aligned with traffic regulations, ideal for driving schools, fleet operators, and public agencies.

*We make driving  
certification 100% objective*

### Product & Services

Mettis will present its AI-driven driver assessment system, including in-vehicle hardware and its integrated digital ecosystem. Visitors will discover how driving data is captured and processed through our platform, dashboard, and mobile applications to deliver objective evaluations, actionable insights, and optimized performance across driver training and logistics operations.

## NEWTONLAB SPACE ↗

**Carles Giner, CEO**

**[cginer@newtonlabspace.com](mailto:cginer@newtonlabspace.com)**

**+34 667 70 07 12**

Newtonlab Space, a holographic lab with showrooms in Barcelona and A Coruña, has developed a new AI holographic concept, NIA, an Ai-based virtual assistant for sectors as health (remote assistance), airports, commercial malls, hotel reception or retail shops. The company, focused on holographic solutions, 3D telepresence and content creation, investigates different holographic techniques and develops its own products and solutions.

*Newtonlab brings you experiences that you will never forget*

### Product & Services

Newtonlab introduces Show Window S, a mini holographic 21,5" device, to show our virtual assistant, NIA, introducing several applications such as remote assistance and telepresence for health. We also want to show the quality of our content by introducing our new CGI (computed-generated imagery) solution with immersive reality holograms that bring unparalleled flexibility and innovation, enhancing brand awareness while significantly reducing expenses and environmental impact. From captivating visual storytelling to real-time updates across multiple locations, holograms offer a dynamic way to connect with customers.

## NIDUS LAB ↗

**Ana Lozano Portillo, Founder&CEO**  
 nidus@nidus.io  
 +34 666 60 00 05

Nidus Lab is a deep-tech company using Generative AI to transform real estate development and industrialized construction. Our platform automates and optimizes feasibility studies, architectural design, and prefabrication workflows, reducing project timelines from months to hours. By integrating design constraints, cost analysis, and regulatory constraints from the earliest stages, we help developers, architects, and construction companies design smarter, faster, and more sustainable buildings.

*Design Smarter.  
 Build Better. Powered by AI*

### Product & Services

Nidus Lab showcases a Generative AI platform transforming real estate development, industrialized construction, and hospitality design. Our solutions - Nidus Housing, Nidus Industry, and Nidus Living - automate feasibility studies, architectural optimization, and prefabrication workflows in real time. By integrating sustainability, regulatory compliance, cost analysis, and buildability from the earliest stages, we help developers deliver smarter, faster, and more sustainable projects.

## ONEPLAN ↗

**Héctor Soto Cadavid, CEO & Founder**  
**hector@oneplan.tech**  
**+34 699 01 87 70**

OnePlan is a financial planning and analytics platform that helps companies optimize budgeting, forecasting, and reporting processes. By integrating data and leveraging advanced automation and artificial intelligence, it enables finance teams and CFOs to access real-time insights, enhance decision-making, and drive more agile and strategic business performance.

## *Oneplan SaaS: the new era of intelligent financial planning*

### Product & Services

Oneplan is an AI-powered financial planning SaaS platform designed for finance teams in SMEs and growing companies. It centralizes all financial information in real time, eliminating reliance on multiple spreadsheets and fragmented data sources. The platform offers collaborative budgeting, intelligent forecasting, scenario simulation, and automated reporting, all through a conversational interface powered by virtual strategy and finance avatars. The result: faster decision-making, reliable data, and a CFO who leads with vision instead of constantly putting out fires.

pibiCo is a Spanish technology-based company born in 2019 in Asturias. We help SMEs grow through two complementary lines: strategic business consulting (forensics, process optimization, business development) and tailor-made digital solutions built on our open-source PILOt platform. PILOt combines industrial IoT, edge hardware, an integrated ERP/CRM and explainable AI to digitize any business process. Active in Spain, Portugal and Ireland across industry, maritime, environment, energy, construction and SME management.

Supported by:

*pibiCo...  
engine to innovate*

### Product & Services

pibiCo brings to VivaTech PILOt, our open-source industrial platform that fuses IoT, edge computing, ERP/CRM and explainable AI into one offline-first solution for SMEs. Unlike generic SaaS, every PILOt deployment is shaped to the customer's real process — no per-user fees, no vendor lock-in. We will demo flagship projects in smart manufacturing (AIDuct Pro, MOBILYTICS, pibiConnect), environmental compliance (MineSentinel, HydroSentinel), maritime safety (smartPILOt) and energy efficiency (CONSUM-IA). We are looking for European partners, integrators and pilot customers.

## QC SOLUTIONS ↗

**Marcos Altarriba, CEO**  
[marcos@qcsolutions.io](mailto:marcos@qcsolutions.io)  
**+34 630 26 39 89**

Quantum Computing Solutions (QCS) helps enterprises and public institutions prepare for the post-quantum era. We specialize in post-quantum cryptography (PQC), cryptographic governance, and long-term protection of critical digital assets. Through advanced consulting, sovereign security architectures, and the QTM standard for autonomous quantum-resistant files, QCS enables organizations to transition safely toward quantum-resilient infrastructures while maintaining interoperability with existing systems.

Supported by:

## *Quantum-Resilient Security for the Next Digital Era*

### Product & Services

QCS provides post-quantum cybersecurity solutions focused on cryptographic transition, digital sovereignty, and long-term data protection. Our services include PQC readiness assessments, cryptographic inventory and governance, migration roadmaps, and integration of quantum-resistant security architectures into enterprise environments. We also present QTM (.qtm), an open and autonomous file standard designed to protect critical documents against future quantum-enabled attacks through hybrid encryption, post-quantum signatures, and offline verifiability.

## RESIZES ↗

**Guillermo Vigil, CEO**  
**platform@resiz.es**  
**+34 623 10 75 08**

Resizes is the technology core that orchestrates complete technology stacks: applications, AI agents, APIs, databases, MCPs, and every component a business runs on.

Resizes operates as the unified layer where everything deploys, scales, and connects across any cloud environment without switching tools or managing integrations. Businesses scale with full visibility into costs, resources, and performance across the entire environment. The platform handles the operational complexity of running modern technology stacks.

Supported by:

*One platform for AI agents.  
Up to 60% less cloud spend*

### Product & Services

Resizes Agentic Platform is our autonomous AI agents solution that works continuously to keep your technology and company costs under control:

- FinOps Agent → Automatically optimizes and reduces cloud spending.
- Security Agent → Detects vulnerabilities and software anomalies before they become a problem.
- Observability Agent → Monitors your software 24/7 with full traceability and real-time alerts.

Everything centralized in a single platform, with no manual intervention required.

Shakers is the AI-native platform for the future of work. We help European leading companies build high-performance hybrid teams combining vetted senior specialists with AI agents to execute complex, strategic projects at speed. Our AI matches the right talent to each challenge, streamlining the full hiring cycle from selection to contracts, payments and project management. Backed by Partech, and trusted by global enterprises like Inditex, Microsoft, and Telefónica, Shakers is redefining how large organisations orchestrate the workforce of the future.

Supported by:

*Connecting Europe's leading companies with AI talent*

### Product & Services

Shakers presents its talent platform: an AI-powered solution that assembles and manages hybrid teams of senior human experts and AI agents for complex business challenges. Key capabilities: intelligent talent matching in under 24 hours, AI agent integration into project workflows, and end-to-end project management covering contracts, payments, and performance tracking. Built for European leading companies that need to move fast without compromising quality, Shakers delivers the right team, fully operational, from day one.

## SIGNATURE PARFUMES ↗

**Armando Medina, CEO**

[armando.m@signatureparfumes.com](mailto:armando.m@signatureparfumes.com)

+34 637 69 21 55

Signature Parfumes is a Spanish fragrance technology company led by inventor Armando Medina. Built by a team specialized in perfume innovation and sensory technologies, the company develops patented systems combining fragrance, digital interfaces and AI to transform traditional perfumery into a more personal, interactive and scalable experience. Its flagship technology enables 80+ million bespoke fragrance combinations from only five perfumes.

## *Fragrance Layering, Reimagined*

### Product & Services

Signature Parfumes presents a patented fragrance technology that combines a connected device, an interactive app and AI-assisted personalization. The system allows users to create their own signature fragrance from five perfumes specifically designed for layering, unlocking 80+ million possible combinations. It brings traditional perfumery into a more digital, personal and experiential format for luxury retail, beauty brands and future consumer experiences.

## VEGANIC ↗

**Belén Torregrosa Moreno, Head of Global Marketing**  
**admon2@veganic.bio**  
**+34 614 31 51 97**

Veganic is a pioneer in developing innovative agricultural biosolutions based on plant extracts and microorganisms, offering disruptive and effective products such as biofungicides, bioinsecticides, biostimulants, and organic fertilizers. With a strong commitment to sustainability, science, and ethics, Veganic promotes an efficient, regenerative, and cruelty-free agricultural model, supporting farmers in their transition toward more responsible production systems.

Supported by:

*Its time  
to grow different*

### Product & Services

Veganic offers a portfolio of agricultural biosolutions to improve crop productivity, sustainability, and resilience. It includes biocontrol solutions (biofungicides, bioinsecticides, and advanced microbial technologies), biostimulants based on botanical extracts and minerals, and organic fertilizers that enhance soil health and nutrient efficiency. The company also develops proprietary agronomic technologies and provides technical support, training, and field validation, ensuring effective and scalable solutions for modern agriculture.

## VERÁZIAL LABS ↗

**Emilio Gallego Sotos, CEO**  
[emilio.gallego@verazial.com](mailto:emilio.gallego@verazial.com)  
**+34 960 25 30 74**

VERAZIAL LABS provides advanced and completely secure fingerprint, facial, and iris biometric identity solutions for high-stakes sectors. In hospitals, we prevent patient harm caused by misidentification. In pharmaceutical companies, employees gain passwordless access and electronic signatures in GMP environments, ensuring compliance, operational efficiency, and data integrity. In security sectors, we help prisons maintain trustworthy records and control of inmates and visitors, and support forensic professionals in their criminal investigations.

Supported by:

*True identity  
for a safer world*

### Product & Services

Verázial ID is a complete software suite for global secure identity management. It uses the most advanced fingerprint, facial, and iris biometric technologies. People are identified without errors, quickly, easily, and efficiently in less than 3 seconds. Highly flexible and scalable, it manages databases from 500 people up to millions. It is multiplatform, available for Windows PCs, Android devices, and the web. It is hardware-agnostic and works seamlessly with biometric sensors from different brands and types. It also integrates easily with any type of corporate software such as ERP, MES, EBR, LIMS, HIS, and EHR.

## WATTSON SMART CHARGING ↗

**Juan Roldán Burgos, CEO**  
[acasquero@wattsoncharge.com](mailto:acasquero@wattsoncharge.com)  
 +34 686 53 59 83

Wattson develops intelligent energy management and ultra-fast mobile charging solutions for electric vehicle fleets. Combining IoT, cloud platforms, data analytics, and AI-driven optimization, Wattson helps companies improve energy efficiency, optimize charging operations, and accelerate the transition to sustainable electric mobility. Its solutions enable flexible, scalable, and efficient fleet electrification while reducing operational and environmental impact.

*Wattson,  
charge anywhere, anytime*

### Product & Services

Wattson will showcase Wattson Go and Wattson Box, its ultra-fast mobile and semi-mobile charging solutions designed to provide flexible EV charging wherever fixed infrastructure is limited, enabling rapid deployment for fleets and operations.

# WEALTHREADER ↗

**David Lozano, Founder and CEO**  
**[hola@wealthreader.com](mailto:hola@wealthreader.com)**  
**+34 919 93 26 29**

Wealthreader is a regulated financial data infrastructure company helping fintechs, wealth platforms, ERPs and financial institutions access and unify banking and investment data across Europe and beyond. Authorized by the Bank of Spain for AIS PSD2 and ISO 27001 certified, our API turns fragmented financial information into reliable, actionable data to build smarter, compliant and scalable financial products.

*The API for those who choose to know*

## Product & Services

At VivaTech, Wealthreader will present its financial data API: regulated account information services under PSD2, advanced bank and custodian connectivity, investment portfolio aggregation, and data standardization tools. Our solutions enable fintechs, wealth platforms, ERPs and financial institutions to securely access, unify and use financial data to automate processes, improve user experiences and launch scalable, compliant products faster.

## WENALYZE ↗

**Carlos Albo, CEO**  
[antonella@wenalyze.com](mailto:antonella@wenalyze.com)  
**+34 647 99 39 06**

Wenalyze is a Spanish fintech company that develops Sync, a real time expense automation solution that captures corporate payments directly from mobile wallets without relying on open banking APIs. Sync enriches transactions with merchant intelligence and integrates with accounting systems to streamline financial operations for businesses.

Supported by:

*Simplify corporate expenses.  
No receipts. No manual reporting*

### Product & Services

Wenalyze Sync is an AI-powered solution that turns every payment, anywhere, into a verified expense in real time.

No receipts. No manual entry. No new cards.

## WITH MADRID ↗

**Geoffroy de Ribou, CEO**  
[geoffroy.deribou@with-madrid.com](mailto:geoffroy.deribou@with-madrid.com)  
**+34 682 91 42 18**

WITH Madrid is a tech-driven service group specializing in Generative AI, Data Intelligence, and Bespoke Engineering. We bridge the gap between strategy and execution by building high-performance products like custom RAG systems, LLM-powered assistants, and predictive data architectures. Focused on the “Where the paint is fresh” philosophy, we industrialize emerging tech to solve complex business challenges for leaders in Luxury, Finance, Energy, Health and Automotive.

*We go where  
the paint is fresh*

### Product & Services

We deliver end-to-end Generative AI solutions engineered for global scale. We move far beyond POCs to deploy industrial-grade innovation for major corporations. Our expertise covers the entire AI stack: from Azure AI Foundry and Copilot integration to bespoke Agentforce frameworks and custom AI agents. We build robust, scalable architectures and automated pipelines that seamlessly integrate into existing ecosystems. By focusing on production-ready reliability and high-performance data engineering, we transform complex AI concepts into proven, scalable business realities.

## WOZA LABS ↗

**Sebastian Priolo, CEO**  
[hello@wozalabs.com](mailto:hello@wozalabs.com)  
**+34 965 02 31 45**

Woza builds operational intelligence infrastructure for the industries that power civilization: energy, agriculture, forestry, and the public sector. Fusing science, engineering, and AI, we deploy systems that turn complex physical realities into operational decisions: climate risk for utilities, agricultural intelligence for global commodity flows, forest intelligence for natural capital.

*The technology  
that powers what's next*

### Product & Services

Predicterra: climate risk intelligence for energy operators. Quantifies how extreme weather, hydrological shifts, and long-horizon climate exposure will impact generation assets, grid reliability, and investment decisions.

AboveForest: forest intelligence at operational scale. Turns satellite, biophysical, and field data into decisions on biomass, carbon, biodiversity, and risk across millions of hectares. Built for forest operators, public agencies, and natural capital markets demanding measurable, defensible outcomes.

## ZERTIA ↗

**Jose Manuel Mateu de Ros, CEO & Founder**  
[jmmateu@zertia.ai](mailto:jmmateu@zertia.ai)  
 +34 629 23 41 67

Zertia is an ANAB-accredited certification body specializing in AI and data governance. We certify management systems against ISO/IEC 42001 and audit AI agents under AIUC-1, helping organizations turn regulatory exposure (EU AI Act, NIST AI RMF) into operational assurance.

With offices in Boston, Madrid, and London, we serve AI and SaaS providers and enterprises globally that require independent, technically rigorous AI assurance. Our certifications and audits are designed to withstand scrutiny from regulators, boards, investors, and the market.

Supported by:

*AI trust,  
certified*

### Product & Services

Zertia delivers independent assurance across the full AI governance lifecycle. Our ISO/IEC 42001 certification and pre-certification services validate the maturity of AI Management Systems, while AIUC-1 certification provides specialized assurance for AI agents. We conduct high-risk AI system audits aligned with the EU AI Act, ISO/IEC 23894-based AI risk analyses, and NIST AI RMF assessments to translate regulatory exposure into operational controls. Zertia Academy complements this offer with executive and technical training on AI governance, auditing, and compliance.

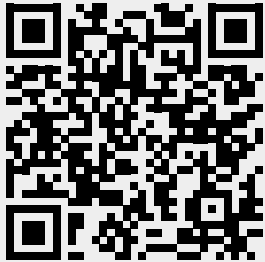

## ICEX

### INTERNATIONALIZATION AND FOREIGN INVESTMENT AGENCY

ICEX España Exportación e Inversiones is the Spanish public organization attached to the Ministry of Economy, Trade and Business responsible for supporting the internationalization of Spanish companies and attracting foreign investment to Spain.

ICEX helps companies expand internationally through trade promotion activities, international events, market intelligence, business matchmaking, talent and training programs, and specialized advisory services. Through its global network of Economic and Commercial Offices, ICEX works across sectors and markets to strengthen the international competitiveness of the Spanish economy.

Website: **ICEX**

Oficina Económica y Comercial  
de España en París.  
George V 47 París  
45008 FR
